# Infrastructure And Learning Resources

The library is automated with digital facilities using Integrated Library Management system, adequate to e-resources and journals are made. The library is optimally used by the faculty and students.

Document: Library Management System- Auto Lib

Integrated Library Management System – Auto Lib 1.0 Library Software

Software for university Libraries Auto lib is a library management software designed and developed by the INTACH. It is user-friendly software developed to work under a client-server environment. The software was designed to automate all housekeeping operations in the library.

Functional Modules:

Sr. No.	Auto Lib 1.0 Description
1.	Acquisition
2.	Catalogue
3.	Circulation
4.	Reports
5.	Administration

About AutoLib

It is software which manages the all possible functions of Book Library.

It is developed by :

Intact

A registered company.
Varanasi (U.P.) India.
Contact: 09839110608

The common features of this software are:

- Easy to handle.
- Multi user system.
- Network based system.
- Granting permissions to individual user separately.
- Easy to backup and restore data.
- Book's Cover page and Index Page can be store with the book's details.
- Library member's photograph can be store with the member's details.
- Library member type creation.
- Library Member Entry Form.
- Books/Magazine/Journal/News Paper entry form.
- Common form for Issue and Return.
- Automatic late fine calculation.
- Automatic cataloging.
- Library Card printing.
- Easy to fined no dues.
- List of Issued books.
- Quick Library Audit List generation.
- Easy to search books.
- Reach set of queries and reports.
- Barcode printing.

Catalogue:

Cataloguing is the most important module of the LMS from the point of view of retrieval of information. In Auto Lib 1.0 bibliographic details such as Title, Author, Publisher, Edition, ISBN etc can be entered in well-defined manner. Once this information is saved, a record is generated. Using Catalogue module user can add bibliographic and authority records in the library catalogue, the database of books, that are owned by a library

Circulation:

The Circulation module allows us to create/edit/delete/search User records, renew membership and establish relationship between the user and resources by creating transaction records (Issue/Return/Renew), Reserve the item(s), Book bank transaction facility and get number of routine reports and some management reports.

The module deals with all operations related to library members i.e. creation, deletion, and modification of members. Apart from these users may copy an existing membership record update it with a new membership code. User can search membership records by using the option search member by using different searching parameter such as code, name, department, designation, entry date, category and if user want to delete any member that there are two options to delete membership record, either single member or Group member deletion.
